Usage

there are some files with server1.py and client1.py these are actually used for understanding and written by me only but i am improved the codes with files names server.py and client.py

To run the server and client files, use the below commands:

```
python3 server.py
python3 client.py
```

Usage

To run the server file in Question 2 , use this command:

```
python3 4.py
```
